

## RESEARCH STUDY FOR PEOPLE WITH MILD MEMORY AND THINKING PROBLEMS

### WHAT IS THE PURPOSE OF THIS STUDY?

Sanders-Brown Center on Aging is part of an international research study that examines a medication which may slow or stop the progression of Alzheimer's disease. We hope to find out whether the study medication can reduce the amount of amyloid in the brain that might be causing the memory and thinking problems.

### WHAT WILL HAPPEN DURING THE STUDY?

This study lasts approximately 2 years and involves bi-weekly infusions of the study drug, brain imaging, blood work, memory testing, physical exams, and optional spinal fluid collection.

### WHO CAN PARTICIPATE?

People who are 50 years or older and experience mild memory and thinking problems.

### WHY SHOULD YOU JOIN?

With your help, we can move the field one step closer to finding a cure for Alzheimer's disease!
