

CLARITY-AD: A RESEARCH STUDY FOR PEOPLE WITH MILD MEMORY PROBLEMS

WHAT IS THE PURPOSE OF THIS STUDY?

To evaluate whether BAN2401, a study drug, may slow or stop the progression of memory problems

WHAT WILL HAPPEN DURING THE STUDY?

- This study lasts approximately 2 years
- Infusions of the study drug or a placebo will occur every two weeks
- If you complete the study, you will have an opportunity to be on the active medication for up to two years

WHO CAN PARTICIPATE?

- Individuals ages 50-90
- Individuals with mild memory problems or mild Alzheimer's disease
